

## Boost your APS performance

Many companies use planning tools that have been implemented several years ago. Models and parameters have been set at the start, but often not adapted to rapidly changing dynamics. Moreover, everybody seems to embrace advanced analytics to get grip on this evolving environment, and companies are afraid to fall behind.

APS vendors are fuelling this fear by promoting next generation tools as the solution. Next to the traditional APS vendors 'new kids on the block' are emerging, making it even more difficult to make a choice.

Only few companies already have a good view on how advanced analytics could give them a competitive advantage and dread to start the IT journey.

### **Easy access to advanced analytics right now**

The good news is that companies can buy time to prepare and detail their IT roadmap, while getting access to the latest advanced analytics capabilities. Planning Services offers proven analytics that can be easily connected to running APS and ERP systems.

This allows you to quickly improve the quality and efficiency of your forecasting and planning processes and be prepared for changing business dynamics.

# Boost your APS performance

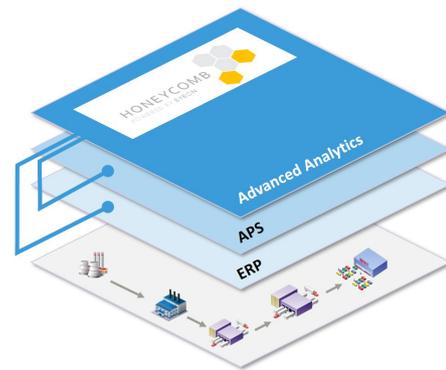

Planning Services offers advanced analytics for

- **Forecasting & Demand management:**  
Best possible forecast based on internal or external data using latest statistical techniques.
- **Inventory & Supply optimization:**  
Optimized single/multi-echelon parameter settings using unique analytical models.
- **End-to-End supply chain insights:**  
Powerful visualizations turning data into actionable insights to facilitate fast decision making.

## Honeycomb platform

Our services all run on Honeycomb: EyeOn data science platform for advanced forecasting, inventory optimization & scenario analysis.

Honeycomb combines state-of-the art data science capabilities for data preparation, modeling, machine learning & analytics and visualization with a secure and fully scalable data storage environment.

## Why connecting to Planning Services?

By connecting to our services your planning performance gets an instant boost. We increase forecast accuracy and reduce bias, lower inventories and improve service levels. We enable planners and the organization to rapidly transform to the next planning level. And deliver clear insights to your specific planning needs, to shape your future planning capabilities at your own pace.

## How can we help you?

Lighten your load. Let us assist you with advanced forecasting, inventory optimization and end-to-end supply chain insights. Make use of our specialised planning and forecasting resources to get ahead.

## Interested?

**3 steps to tap into Advanced Analytics**

**Step 1 - Proof of Concept**

- Assess business characteristics & dynamics
- Quantify benefits of using advanced analytics
- Detail implementation approach

**Step 2 - Design & configure**

- Set up secured exchange of data
- Configure analytics plugins in Honeycomb
- Run end-to-end process & system tests

**Step 3 - Execute**

- Run analytics & optimize parameters
- Ensure smooth process execution
- Hands-on support to continuous improvement

**EyeOn promise**

We implement proven innovations to raise your forecasting and planning performance. We work in the most pragmatic way possible, based on our knowledge and experience in over hundred large, international companies. We develop and implement the best fit-for-purpose improvements with real impact.
