

Accelerate your business benefits Build-Operate-Transfer

Companies feel the need to do more with analytics and big data to enhance their supply chain planning and forecasting processes. At the same time, there is uncertainty about which direction and approach to take. For instance: “How do you turn data into insights that add business value?” Or “How do you embed fit-for-purpose analytics in the planning cycle?” Just a couple examples of the challenges planning departments face.

The Build-Operate-Transfer method

To get you started on the road to excellent forecasting and planning, Planning Services developed a worry-free, efficient and customized method. With advanced analytics and proactive reporting, you can steer your business in the right direction. You just have to know how.

Empowering you to excel in planning & forecasting

That’s where we come in. Planning Services begins by building and operating processes for you, while gradually transferring our knowledge and expertise to your in-house staff. Instead of having to continually outsource, you build a highly qualified in-house team you can rely on to forecast and plan your business operations.

The Build-Operate-Transfer method does much more than improve the quality of planning & forecasting processes. It enables you to grab business benefits directly while your in-house planning capability grows steadily due to training and on-the-job coaching.

Build-operate-transfer

Accelerate business benefits by outsourcing

Planning Services applies a proven method to design, build and connect fit-for-purpose analytics to your planning cycle; one that turns data into insights, adding true business value directly. This allows you to quickly improve the quality and efficiency of your own forecasting and planning processes.

Together with you, we run and execute the planning cycle. After your new organization has been installed and your employees have been fully trained and coached, outsourced activities are scaled down and your team runs its own high-quality forecasting and planning process.

Areas of expertise

- **Forecasting & Demand management:**
Best possible forecast based on internal or external data using latest statistical techniques.
- **Inventory & Supply optimization:**
Optimized single/multi-echelon parameter settings using unique analytical models.
- **End-to-End supply chain insights:**
Powerful visualizations turning data into actionable insights to facilitate fast decision making.

3 steps to planning excellence

Step 1 – Build

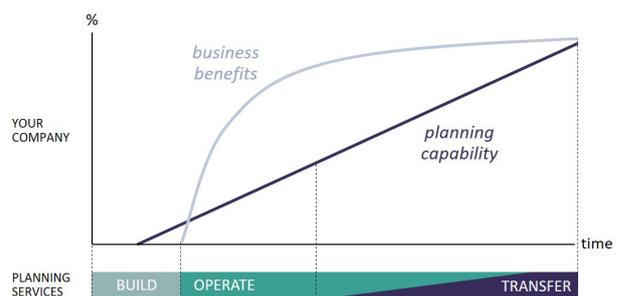

- Run Proof-of-Concept
- Configure analytics and reporting engines at Planning Services
- Connect your process

Step 2 – Operate

- Regular forecast and planning parameter optimization by Planning Services
- Tailored actionable insights shared as a service
- Drive continuous improvement

Step 3 - Transfer

- Handover from Planning Services to you
- Run training programme
- Coach on the job

Why connecting to Planning Services?

By connecting to our services your planning performance gets an instant boost. We increase forecast accuracy and reduce bias, lower inventories and improve service levels. We enable planners and the organization to rapidly transform to the next planning level. And deliver clear insights to your specific planning needs, to shape your future planning capabilities at your own pace.

How can we help you?

Lighten your load. Let us assist you with advanced forecasting, inventory optimization and end-to-end supply chain insights. Make use of our specialised planning and forecasting resources to get ahead.
